

# **PENTAIR** VALVES & CONTROLS

# **KEYSTONE** BUTTERFLY VALVES – RESILIENT SEATED FIGURES 990 AND 920, 1" TO 20", TO 150 PSI

#### **FEATURES**

- One-piece, thin profile, 316 Stainless steel disc/stem provides minimum obstruction to flow, resulting in highest C<sub>v</sub>, lowest pressure drops and best control characteristics. Also available with PTFE, NBR or EPDM molded disc.
- Triple function, resilient dovetail seat isolates body and stem from line media, provides drop-tight shut-off of line media at full-rated pressure and permits convenient and economical replacement in the field.
- Heavy duty, corrosion resistant top bushing provides upper stem support, absorbs actuator sideloading and extends valve cycle life.
- Bi-directional, self-adjusting double V-cup stem seals prevent external contaminants from entering the valve.
- Split body design enables easy field replacement of seat and disc/stem and permits direct mounting of Keystone actuators without the use of couplings or brackets.

#### **GENERAL APPLICATION**

Figure 990 (wafer) and Figure 920 (lug) are used when sanitary service or corrosion resistance is required. Heavy duty applications include food and beverage, pharmaceutical, pulp and paper, mining and power industries. Available with PTFE lining for light corrosive services and rubber lining for light abrasive services.

#### **FLANGE STANDARD**

Figure 990 is a resilient-seated, wafer-style, butterfly valve suitable for installation between ANSI Class 125/150 flanges.

Figure 920 provides drilled and tapped lugs around the valve body, compatible with ANSI Class 125/150 flange standards.

### **TECHNICAL DATA**

#### Sizes:

Figure 990 (wafer style) 1" to 20" Figure 920 (lug style) 2" to 20"

Pressure ratings:

- 1" to 12" 150 psi 14" to 20" – 75 psi
- PTFE or elastomer mold disc
  2" to 12" 100 psi
  14" to 20" 75 psi
- White NBR seats
  2" to 20" 50 psi

# **KEYSTONE** BUTTERFLY VALVES – RESILIENT SEATED FIGURES 990 AND 920, 1" TO 20", TO 150 PSI

### MATERIALS

#### MATERIALS

No.	Description	Material	Material standard
1	Two-piece body with top plate	Cast iron Ductile iron (lug style only) 316 Stainless steel	ASTM A-126, Class B ASTM A-395 Gr. 60/40/18 ASTM A-743 CF8M <sup>1</sup>
2	Thin profile disc	316 Stainless steel Steel Teflon® molded <sup>2</sup> Steel EPDM molded <sup>2</sup> Steel NBR molded <sup>2</sup>	
3	Stem	316 Stainless steel	
4	Seat	NBR food grade (0°F to 212°F) EPDM food grade (-40°F to 250°F) PTFE-lined EPDM (-20°F to 300°F) PTFE-lined NBR (0°F to 250°F)	
5	Stem packing	NBR	
6	Upper stem bushing	Polyester	

#### Notes:

- Not available on 2<sup>1</sup>/2" and 5". Stainless steel bodies, 2" to 6", include upper and lower stem bearings.
- 2. Not available on 1", 11/2", 21/2" and 5".

Based on independent laboratory testing.

### Flow control characteristics

While most butterfly valves achieve an equal percentage characteristic, the Keystone thin-profile disc design does so at a significantly higher capacity through the valve's full travel. This results in not only 100:1 rangeability (Maximum  $C_v/$  Minimum  $C_v$ ), but also greatly increased turndown ratio (Maximum Flow/Minimum Flow).

#### Thin disc flow control

#### Notes:

1. "H" dimension refers to flat on stem.

2. 1" and 11/2" valve assemblies are furnished with integral 10-position throttling plate.

3. "Q" dimension is the minimum allowable pipe or flange inside diameter at the centered body face to protect the disc sealing edge against damage when opening the valve.
